webgenic TECHNOLOGY SOLUTIONS

Vision

- Digitization helps our world by:

  - Unlocking locked-up potential of non-digital content
  - Preserving precious knowledge
  - Reducing usage of paper which saves trees and environment

- Our vision is to provide:

  - Technology tools including hardware & software for Digitization and Document Management
  - Expertise, consulting for large scale Digitization projects

webgenic TECHNOLOGY SOLUTIONS

Digitization with ScanCraft Dual-Configuration Book Scanner

- The first-of-its-kind, commercially available *Made in India* product for large scale digitization projects

- A non-destructive book scanner, no need to remove binding

- Designed for scanning precious old books and documents

- Scans over 1,00,000 pages per month during normal working hours

Digitization with ScanCraft Dual-Configuration Book Scanner (continued)

- A unique, first of its kind in the world, *dual-configuration* scanner

- *V-shaped cradle*: Designed to scan bound publications. Handles delicate & precious old books and documents up-to A3 size

- *Flatbed cradle*: Designed for large documents such as newspapers, manuscripts, maps up-to A2 size

- *Dual-configuration* facilitates switching between V-shaped & Flatbed mode with ease. *Patent applied, application No: 1785/MUM/2014*

- No need to buy two different scanners for bound publication & large documents. Saves cost

- Scanner comes with built-in pre-configured, compact, high-end computer & high resolution monitor with scanning & processing software pre-installed. No need of external computer

webgenic TECHNOLOGY SOLUTIONS

Digitization with ScanCraft Dual-Configuration Book Scanner (continued)

Quality

- Scanner's scanning & processing software produces excellent quality, ready to use digitized books in 99% cases

- Processing features include auto cropping, rotation, brightness, contrast adjustment, color cast removal for old publications and much more..

- Produces high quality scanned output files ready for Optical Character recognition (OCR)

- No additional manpower, hardware, software required for external post processing which significantly reduces costs and time

webgenic TECHNOLOGY SOLUTIONS

Digitization with ScanCraft
Dual-Configuration Book Scanner (continued)

Productivity

- Timer based auto-scanning reduces operator actions for higher scanning rates

- Post processing operations designed for volume processing with minimum operator actions

- Post processing supports unattended batch creation of output files in PDF format

- Bulk processing features support applying operations to all left or right pages, page ranges and more..

- PDF exports can be paused and resumed

webgenic TECHNOLOGY SOLUTIONS

Significance of Document Management Software

- Scanner only completes half the task in digitization projects by producing digital versions (scanned PDFs) of print publications

- Once you scan thousands of print publications into PDFs, how do you manage them? Just copying scanned PDFs into a folder is not very useful

- You need to be able to store, catalog, categorize, search, distribute, display, and protect your digitized publications

- This need of managing digitized publications (scanned PDFs) is addressed by *Document Management software*

- Hence we provide a complete solution consisting of scanner hardware and Document Management Server software *Webgenic eLibraryPlus Server* which fulfills all document management needs of digitization projects

webgenic TECHNOLOGY SOLUTIONS

Document Management with Webgenic eLibraryPlus Server

Webgenic eLibraryPlus Server

- Create elibrary from scanned publications

- Create new digital self-publications such as documents, books, magazines, newsletters and add to elibrary

- Make publications available to worldwide users over the internet or for internal office use over the intranet

- Built-in document Access Control and Subscription Management

webgenic TECHNOLOGY SOLUTIONS

Document Management with Webgenic eLibraryPlus Server (continued)

- Supports multiple input document types such as MS Word, Text, PDF, OpenOffice and more..

- Supports powerful browse & search, customizable meta-data, categories, keywords and more..

- Powerful collaboration features help team work together, even remotely, in creating new publications

- Ideal for creating a digital library, running a paperless office, and more..

- Built using Web Portal technologies

- Runs on Linux (preferred) or Windows OS

webgenic TECHNOLOGY SOLUTIONS

Deployment Options for Webgenic eLibraryPlus Server

On Premise Deployment

- Hardware and software deployed on your premise in your office network

- Server Hardware: Server configuration such as 64-bit multi-core processor based hardware, minimum 32GB RAM, with HDD, SSD or RAID configuration

- Server Hardware can be included in the package or purchased separately

webgenic TECHNOLOGY SOLUTIONS

Deployment Options for Webgenic eLibraryPlus Server (continued)

Cloud Based Deployment

- No need of physical space, hardware, networking, electricity infrastructure for server in your office

- We help to deploy and fully manage your Webgenic eLibraryPlus Server instance in cloud environment

- Annual subscription based pricing for hardware, software & services

webgenic TECHNOLOGY SOLUTIONS

Example Digitization Projects

Our complete digitization solution can be effectively used in following types of digitization projects

- Digitization of old books, manuscripts, newspapers, documents for preservation, archiving

- Digitization of out-of-print old books for re-publishing as digital and/or print editions

- Digitization of printed product manuals

- Digitization of entire library

- Digitization of Health records, documents in hospitals

- Digitization of Land records

webgenic TECHNOLOGY SOLUTIONS

Example Digitization Projects (continued)

- Digitization of documents in banks

- Digitization of documents in insurance industry

- Digitization of documents for e-governance

- And many more ..
